Panel Mount Touchmonitor

Panel Mount has been a mainstay in some circles that need to minimize manpower overheads during installation and to enhance maintenance efficiency throughout the operation. In order to fulfill this need, GT has designed the panel mount touchmonitor that only requires small brackets with fastening screws for quick and easy mounting onto an enclosure.

For operating in harsher environments, GT's Panel Mount touchmonitors utilize Aluminum alloy front frame which makes the unit impervious to dust, moisture, vibrations and wide temperature fluctuations.

Furthermore, the front of this touchmonitor is rated of IP65 (front surface) and IK07. The touchscreen can also be operated with gloved fingers which is useful in certain environments such as factories. Other stringent requirements like wide-range operating temperature (-20~60°C) and wide DC input range (9V~36V) could be opted for some display model.

General Touch meticulously produces its own touchmonitors that are comprehensively tested. Hence, its products facilitate 24/7 and maintenance-free operation. The GT Panel Mount touchmonitors are well suited for: factory automation, Retail, Kiosk, Smart warehouse, transportation, bank services and the like.
